

## WHY ASK YOUR AGENT ABOUT HOME HEALTHCARE?

*Licensed Sales Agent*

- Your Medicare does not cover the cost of private duty care, meal prep, and other important services for recovery
- These plans can help keep you out of a nursing home and ensure you are financially able to recover from home
- These plans can come with a drug benefit that can offset or even completely cover your all of your drug expenses
- The average cost of private duty care is about \$20/hr and can add up to over \$5,000/month. Are you prepared to cover this expense?
- These plans have very limited underwriting and qualifying is often easier than you would expect
- Even if you do have family or loved ones willing to care for you under these circumstances, wouldn't it give you peace of mind knowing that they will not have to shoulder 100% of the burden? Call your agent today and ask them about the Home Healthcare plans available to you
